

Dear Customer,

I would like to share the news that KPH Holdings, LLC (d/b/a Von Weise) has partnered with Dreison International (a privately held motor and specialty products manufacturer). This partnership was formed in January of 2010.

Dreison International (www.Dreison.com) owns DCM Manufacturing, Inc (a producer of motors and air movement products for mobile HVAC applications in truck, bus, agriculture, marine, construction and automotive markets), Maradyne Corporation (a producer of turbo® Precleaners, Pow-R-Quik Starters, Marion Fluid Power hydraulic filters, and HydraMotion hydraulic linear actuators), and holds an interest in SuperTrapp (a producer of high-performance motorcycle, ATV, and automotive exhausts and motorcycle accessories). Dreison has operations in the United States, Mexico and China.

This partnership will provide the infusion of working capital and business support necessary for KPH Holdings to stabilize and improve its Von Weise Gear and Actuator business. The experienced sales, purchasing, manufacturing and quality resources will continue, as will the manufacturing operation in Juarez, Mexico and the corporate office in Eaton Rapids, Michigan.

Your sales manager will contact you shortly to discuss the procedure for placing future orders.

We are very excited about this partnership and the opportunities that it provides to our customers, suppliers and employees. We also want to thank you for the loyalty, patience and support shown over the years. Dreison International and KPH Holdings are committed to a North American manufacturing solution for producing highly-engineered, high quality and reliable products with competitive pricing and lead-times.

Kevin Hein
President
KPH Holdings, LLC (Von Weise)
